

SIYABONGA JOSEPH MSWELI

GRADUATE SOFTWARE DEVELOPER

Email: Simisimsweli8@icloud.com | Mobile: 0768444981 | GitHub: github.com/composure21 | LinkedIn: <https://www.linkedin.com/in/siya-msweli25>

PROFILE

Computer Science Honours graduate specializing in ASP.NET MVC and C# development. Experienced in building ASP.NET Core MVC applications, REST APIs, and database-driven systems using SQL Server and PostgreSQL. Strong foundation in object-oriented programming, software design principles, and full-stack web development. Passionate about developing scalable solutions, solving complex problems, and continuously expanding technical expertise. Seeking a Junior ASP.NET Developer position to contribute to production-grade software and grow within a professional development team.

EDUCATION

The IIE's Varsity College Westville

Jan 2025 – Dec 2025

Bachelor of Computer and Information Sciences in Application Development (Honours)

Graduation: May 2026

Focus: Software Engineering, AI Fundamentals, UX Design, Research Methods.

Related coursework: Covers research methods, ICT for development, emerging technologies, AI, UI design, and a major research project.

The IIE's Varsity College Durban North

March 2022 – Dec 2024

Bachelor of Computer and Information Sciences in Application Development

Focus: Software Development, Cloud Computing, System Design, Cybersecurity.

Related coursework: Covers programming, cloud development, networking, systems design, cybersecurity, and IT practice, building technical and problem-solving skills for the IT industry.

PROJECTS

iPhoneHub | ASP.NET Core MVC E-Commerce Application

- Built a responsive ASP.NET Core MVC e-commerce app using C#, Entity Framework Core, PostgreSQL, and Bootstrap.
- Created dynamic product pages with specs, pricing, storage, and color options.
- Built a session-based cart with quantity control and real-time totals.
- Used MVC architecture to separate data, logic, and user interaction.
- Designed a mobile-friendly UI using Bootstrap and custom CSS.

Trina Oree Biokineticist | ASP.NET Core MVC Booking System

- View available appointment time slots in a calendar-style interface.
- Book and cancel appointments easily as a customer.
- Store and manage customer profiles and booking history.

BizTrack (Expense Tracking Dashboard) | ASP.NET Core MVC Platform

- Displays key financial insights, including income, expenses, savings, budget progress, and spending trends through charts.
- Allows users to record, view, filter, and manage all income and expense transactions in one place.
- Enables users to monitor earnings and spending to maintain better control of their finances.
- Helps users create budgets, track spending limits, and organize financial records using customizable categories.
- Provides forms for adding financial data and managing user profile settings for personalized experience.

SKILLS

Programming Languages: C#, SQL

Front-end Development: HTML, CSS, JavaScript, Bootstrap

Back-end Development: ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, RESTful API Development

Version control & tools: GitHub, Visual Studio, Visual Studio Code

Cloud & DevOps: GitHub, Basic Azure Knowledge

Databases & Data Technologies: PostgreSQL, SQL Server
